

## STAIRLIFTS

Some patients may develop shortness of breath while using the stairs. A grant is available to assist with the installation of a stair-lift (see section on Disabled Persons Grant). Some additional features which may be available on a stair-lift include: seat-belt, adjustable seat height, swivel chair, remote control, and powered foot rest.

It is necessary to submit quotations from 2 separate contractors with a copy of each contractor's *Tax Clearance Certificate of C2 Card*. All quotations submitted must be in accordance with the specifications outlined in your Occupational Therapist's report. Send the quotations and a completed application form to the Disabled Persons Grant Section at your local health authority (see section on Local Health Authority Offices).

In 2006, the maximum grant available towards installation of a straight stair-lift was 2,500 Euro. In 2006, the maximum grant available towards installation of a curved stair-lift was 6,000 Euro (see section on Disabled Persons Grant). VAT is charged but is redeemable (see section on Tax Relief).

### Tip !

- ✓ It may be worth getting a number of quotations for stair-lift installation as prices may vary.

## SUPPLIERS OF STAIRLIFTS

The following list of companies may be worth contacting for quotations. This list is not all inclusive. Local companies may be able to assist you. Ask your Occupational Therapist for their recommendations.

*Disclaimer: The ILFA does not have associations with, recommend, guarantee, or endorse individual suppliers listed in this Directory. Suppliers are listed alphabetically.*
